Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 January 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 1-6 have been examined.

Information Disclosure Statement

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A (1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Objections

Claims 1-6 are objected to because of the following informalities: each claim should be in sentence form, free of grammatical errors including the use of capital letters where the word is not proper or beginning a sentence. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 2 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

In this case the claim is structured as more than one sentence.

5. Claim 2,4,6 recites the limitation "the desired folder" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Gulfcoast On-line Development, Inc ("Gulfcoast", "How to FTP (or transfer) Your Homepage to Our Server).

As per independent claim 1, Gulfcoast discloses a system for implementing an electronic file transfer from a web enabled device to a web server in response to an iconic drag and drop interface (Page 1 lines 18-22), where a user drags the files from

the said web enabled device to a specific location on the website hosted by the said web server (Page 1 lines 33-38), the system comprising: means for capturing information about the selected files when the user drags them from the said web enabled device and drops them onto a specific location of the said website (Page 1 lines 33-38); means for transferring the files from the said web enabled device to the said web server using an existing internet connection (Page 1 lines 19-22).

As per independent claim 2, Gulfcoast discloses a system for implementing an electronic file transfer from a web server to a web enabled device in response to an iconic drag and drop interface, where a user drags the files from a website hosted by the said web server to the said web enabled device the system comprising (Page 1 lines 18-22): means for selecting multiple files in a web browser (Page 1 lines 40-43); means for capturing information about the selected files when the user drags them from the said website and drops them onto the desired folder of the said web enabled device (Page 1 lines 40-43); means for transferring the files from the said web server to the said web enabled device using an existing Internet connection (Page 1 lines 18-22).

Claim 3 and 5 are individually similar in scope to that of claim 1 and are therefore rejected under similar rationale.

Claim 4 and 6 are individually similar in scope to that of claim 2 and are therefore rejected under similar rationale.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- 6,233,600 teaches a drag and drop file transfer interface.
- 6,407,752 teaches a method for a user interface for remote ftp hosts by drag and drop file transferring.
- 5,767,851 teaches a method and apparatus for emulating an environment's drag and drop functionality in a host environment.
- Oakton.edu teaches FTP through a web browser to upload objects to a web server.
